

Technology as a Service (TaaS).

A cost-effective, flexible way to benefit from the latest technology

One simple subscription for all your business technology.

Our Tech-as-a-Service (TaaS) model allows you to obtain the latest technology now, spreading the cost of your investment over a 12, 24 or 36-month period. It's much more flexible than traditional finance models, allowing your business to scale and upgrade hardware during term, as you need it.

Source the right technology today, at the lowest cost available and remain adaptable and agile for future changes.

Business Benefits of TaaS

Optimise budget

Don't get locked into traditional, outdated finance models. TaaS provides the flexibility your business needs to flex as you grow, and TaaS can also save you up to 30% on your technology purchases.

Account management

Your dedicated account manager will help you design your TaaS scheme for maximum business benefit, advising where cost-savings can be made.

Simplify billing

Simple monthly billing with one point of contact, so you can plan and budget for your needs.

Flexibility to scale

TaaS gives your business room to grow and meet your evolving technology requirements.

Empower employees

Use your technology investment to build a better future for your business, with improved productivity, flexible working and improved security for your employees.

Increased accessibility

No need to plan and wait, order the latest technology as and when you need it.

Afford the best technology, right now.

More competitive and flexible than traditional leasing, TaaS is an intelligent finance solution specifically designed to meet your evolving business need for ongoing investment in new technology.
